Falcon® Mobile Computers - Streamlining The Supply Chain

Every step through the supply chain has data that needs to be captured, information that needs to be processed, and materials that need to be tracked. Whether it's raw materials for a manufacturing process, warehouse inventories, or products in the distribution channel, all must be effectively managed in order to optimize supply chain efficiency and ensure that the right products get to the right destinations, at the right time.

PSC's Falcon® line of wireless terminals and computers get this job done. Fast. Efficiently. Cost-effectively. Falcon® portable, vehicle and fixed station terminals and scanners enable the collection of critical business data at every point in a supply chain.

Additionally, as a Cisco® Premier Certified Partner, PSC is able to integrate Falcon terminals with Cisco Wi-Fi™ 802.11b wireless LAN products enabling the deployment of secure, high performance wireless networks.

Whether the need is for terminal emulation, support for DOS or Windows® CE-based applications, or just scanning, a comprehensive solution can be created using PSC's Falcon® wireless terminals.

Falcon® 4400 Series

Top-of-the-Line Performance In Windows® CE .NET Handhelds

The Falcon® 4400 series packages the power of the latest computing technology in rugged, ergonomic mobile computers.

Falcon 4400s are designed to excel in distribution center, warehouse and retail in-store environments. Coupled with a wide range of scanning options, low operating temperature specification, loud speaker volume, large color or monochrome displays and an IP54 environmental seal rating, the Falcon® 4400s are well suited to withstand the rigors of most commercial and industrial environments.

Inside the 4400 series are cutting edge technologies from mobile and wireless industry leaders. Featuring an Intel® XScale™ processor, Cisco wireless technology and the Microsoft® Windows CE .NET operating system, the Falcon 4400 line of mobile computers have the power and flexibility to deploy sophisticated mobile applications.

Falcon® 4400 models with an integrated handle are ergonomically designed for scan-intensive applications. Handless models are contoured to fit comfortably in an operators hand for extended periods of fatigue-free data collection activities. The Falcon Management Utility and Falcon Desktop Utility are included with every unit providing remote management and configuration.

The Falcon® 4400 series are at home in both warehouse and in-store data collection activities.

Falcon® 4400 series are available with optional IBM 5250 terminal emulation keypad

Falcon® 4200 Series

Powerful PDAs With Integrated Bar Code Scanner

The Falcon® 4200 series are compact rugged PDAs combining the flexibility of the Microsoft® Windows CE operating system with RF data communications and bar code scanning. The Falcon® 4200 series are designed for retail, warehousing and logistics applications where maximum performance is required in a compact form.

The Falcon® 4200 series incorporates top features including the latest in mobile computing technology from Microsoft and Intel, an integrated bar code scanner, and a large 1/4 VGA mono or color touch screen display. User accessible slots provide maximum flexibility. A built-in keypad provides additional ease of data entry.

Falcon® 4200 series PDAs are ready to run right out of the box with Microsoft® Pocket WordPad, Internet Explorer and Inbox (e-mail) applications.

Falcon® 4620

Rugged Vehicle Mount Windows® Computer

The Falcon® 4620 is designed for the harshest environments of the warehouse or loading dock. It features the latest Microsoft® Windows® operating system coupled with a powerful 800 MHz processor, and a choice of 2.4GHz 802.11b radios including Cisco Aironet or Symbol Spectrum24 HR.

The Falcon® 4620 boasts a bright 12.1" color touchscreen display, yet the installed system is similar in size to many 10" competing models. The 12.1" screen is ideal for touchscreen applications, and features a bright display, providing great readability both indoors and out.

The 800MHz processor combined with up to 512MB RAM provides the performance necessary for the most complex applications. Integrated wired Ethernet allows easy initial loading of the operating system and applications. And the shock resistant 20GB hard disk drive provides ample storage space, or for ultra-rugged applications a 2GB Flash with no moving parts is available.

The Falcon® 4620 low profile mounting system features keyboard and PSC's PowerScan™ RF handheld scanner

Falcon® 345

Flexibility In Wireless Communication

Falcon® 345 data collection terminals set the standard for flexibility in wireless communications, providing connectivity for data collection applications where real-time information is critical.

The Falcon® 345 features a powerful 486/33 MHz microprocessor and 8 MB of RAM. The 345 can also be configured with any of the leading 2.4GHz spread spectrum wireless LAN solutions including Cisco Aironet or Symbol.

Additional flexibility comes with the wireless connection of Falcon 345 terminals into an existing legacy system. The Falcon® 345 comes with a choice of 25, 38, and 48-key keypads. A batch model, the Falcon® 340 is also available.

Falcon® 345 with standard 38-key alphanumeric keypad

Keypad configurations available with the Falcon® 345

48-key full alphanumeric

25-key large numeric

Falcon® 335

Wireless Data Collection In The Palm Of Your Hand

The Falcon® 335 excels in data collection throughout the supply chain where real-time access to data is required. Its internal antenna is protected and its 2.4GHZ spread spectrum radio options include Cisco Aironet or Symbol radio support. In addition, the Falcon® 335 features a powerful 486/33 MHz microprocessor and 8 MB of RAM.

Open standards, powerful applications and ease of use allow Falcon® 335 terminals to integrate seamlessly into the supply chain of companies involved in retail, warehousing, distribution, logistics and manufacturing. There are two keypad options; the standard 38-key alphanumeric and the 25-key large numeric keypad.

A batch model, the Falcon® 330 is also available.

The Falcon® 335 is available with either a standard 38-key full alphanumeric or 25-key large numeric keypad

Falcon® 325

Real Value In A Wireless Data Collection Terminal

The Falcon® 325 wireless data collection terminal is ideal for data collection throughout the supply chain where real-time access to data is required. The Falcon® 325 is rugged enough for the warehouse and ergonomically designed for ease of use. The Falcon® 325 is equipped with a 16-line screen, 486 class processor, 33MHz operating speed, integrated scanning and a user-accessible PC Card slot. Open standards, powerful applications and ease of use allow the 325 to integrate seamlessly into the supply chain of companies involved in logistics, manufacturing, retail, warehousing and distribution. Also available is the Falcon® 320 for batch data collection solutions.

Falcon® 625

Falcon® 515

Added Durability In DOS Vehicle Mount & Fixed Station Computers

The Falcon® 625 is designed to excel in the harshest environments. Equipped with a IP66 sealed enclosure, the 625 is highly resistant to extreme temperature, vibration and impact.

The Falcon® 625 has a powerful 486 class processor and operates under DOS 6.22. The 625 comes equipped with an EL super bright VGA display and the integrated sixty key keyboard is backlit. Available keyboard configurations include QWERTY or ABCD.

The Falcon® 625 can be configured with any of the leading 2.4GHz spread spectrum wireless LAN solutions including Cisco Aironet or Symbol.

The Falcon® 515 fixed station computer features a 15 line x 40 character color or monochrome display, an IP54 enclosure rating, 2PC card slots, 2 serial ports, and 2 input ports for a variety of devices such as Power-Scan™ handheld scanners or mag stripe readers. The Falcon® 515 also features enhanced, relay-protected digital I/O ports to control devices such as warehouse carousels, light tables, locking mechanisms, and more for a maximum of automation flexibility.

The Falcon® 515 has a 486 class processor and operates under DOS 6.22. The 515 comes standard with 8Mb of RAM, 2Mb of Flash ROM, two internal PCMCIA Type II slots and a 69 key QWERTY keypad.

Falcon® PT40

Entry-Level Data Collection In A Compact Package

The Falcon® PT40 is an entry-level, pocket-sized bar code data collection device sized to fit in a shirt pocket or on a belt clip like a cell phone. The PT40 is designed specifically for retail-in-store or light industrial applications such as cycle counting, shelf and price management, item tracking and order entry.

The lightweight (4.2oz) Falcon® PT40 features an integrated laser and rechargeable Lilon battery. The PT40 comes with software pre-loaded enabling out-of-the-box scanning and data collection.

Also included with the PT40 is a Windows® Program Generator allowing for the creation of complete applications within a few hours.

Falcon® TopGun®

Cost-Effective Reliable Performance

TopGun® is a cost-effective integrated laser scanning solution. It's rugged one-handed design gives durable, reliable performance and freedom of movement, even in the most demanding industrial work environments. TopGun® consists of a portable data collection terminal integrated with a laser module. TopGun® is lightweight and easy to use. It operates like any other handheld laser – just aim it and pull the trigger. LEDs located on the back of the scan head indicate laser activation and good reads. An audible tone also indicates scanning success. TopGun® easily scans bar codes on flat, curved or irregular surfaces at distances from 2.5 to 36" / 6.0 to 91.0cm.

Management & Development Tools For Enhanced Falcon® Flexibility

Falcon Management Utility (FMU) is a powerful administrative tool that centralizes the installation, maintenance, and management activities associated with a Falcon data terminal deployment. FMU comes with each Falcon 4400 series and 4220 mobile computer.

Falcon Desktop Utility (FDU) provides a mechanism to configure the user environment on Falcon Windows CE .NET portables, including Windows CE accessibility, Internet Explorer configuration, and the definition of a list of authorized applications. FDU comes pre-installed on Falcon 4400 series and 4220 portables.

Wavelink Studio is a wireless application development platform that allows developers to create robust wireless applications for mission-critical environments on any PSC Falcon® RF portable.

Wavelink Mobile Manager allows wireless administrators to deploy, maintain, and manage multi-vendor wireless LAN (WLAN) infrastructure with greater ease and efficiency.

Wavelink Avalanche is a client management system that automatically deploys software and configuration updates to a variety of vendor's mobile devices.

Wavelink Terminal Emulators provide industry standard terminal emulation capabilities for PSC's Falcon® data terminals. Includes VT100/220, HP 700/92, IBM 5250 and 3270 emulations.

Falcon® Services & Support

Professional Services, Technical Support And Maintenance Programs

When you purchase our best-in-class batch or wireless PDT's, PSC and our certified partners stand ready to assist you in getting the most for your data capture dollar. Easy to understand, customized to your requirements and geared to provide lasting value and efficiency, PSC programs and service agreements can help you to get the results you want, on schedule and within your budget.

Site surveys, installation, configuration, custom programming, training development and delivery, technical services, web and phone-based technical support, next-day replacement, depot repair programs, maintenance training and authorization... at PSC we understand that one-size does not fit all.

To learn how we can help you design, implement and maintain your PSC system solution call 1-800-547-2507.

PSC Support and Services... building value for life.
